***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 18 and 19 (group I), drawn to lithium compositions and a method for making the same, classified in class 423, subclass 593.1+.
- II. Claims 15-17, 20 and 21 (group II), drawn to a battery and method for making the same, classified in class 429, subclass 223+.

The inventions are distinct, each from the other, because of the following reasons:

The inventions set forth in claims 1-14, 18 and 19 (group I) and claims 15-17, 20 and 21 (group II) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because each group of claims is capable of supporting its own patent. The subcombination has separate utility. For example, the utility of the composition of the claims of group I may be used as a filtering medium for separating solids out of a fluid, which is a separate utility from the battery of the claims of group II.

Because these inventions are distinct for the reasons given above and the claims set forth in groups I and II have acquired a separate status in the art as shown by their

Art Unit: 1754

different classification; the search required for any selected group of claims is not required for the other non-selected group of claims, and the claims set forth in groups I and II have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The applicants are advised that in order for their reply to this requirement to be considered complete, it must include an election of the invention to be examined - even though this requirement may be traversed (37 CFR 1.143).

The applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
